## In the Box

- A. TERRANO Q Main Unit
- B. Secondary Speaker
- C. Slim Helmet Mount x2
- D. Helmet Mount x2
- E. Magnetic USB-C Charging Cable
- F. Spare Microphone Sponge
- G. Alcohol Pad

## Assembly on Helmet

1. The unit can be placed on the left or right side of helmet. The microphone can be rotated to support both sides.

2. Use the adhesive glue to place the Helmet Mount on relatively flat patch on the lower back side of the helmet. Alternatively you can use the optional Buckle Strap together with the wider Helmet Mount.

3. For best results clean the surface, peel of the white tape from the Helmet Mount and place and hold in place for at least 1 minute, wait 10 minutes.

4. Slide the TERRANO Q into the Helmet Mount and bend the boom such that the speaker will align with the center of your ear.

5. Repeat the process for the secondary speaker if used.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
