Accessing more information

To view the full user manual on your device
launch the Setting app and tap User Manual.
Visit www.rebeosoii.com to view device
information, the manual and more.

Maintaining water and dust resistance

The device may be damaged if water or dust
enters the device.
Follow these tips carefully to prevent damage
to the device and to maintain the water and
dust resistant performance of the device.
Do not immerse the device in water deeper
than 1.5m or keep it submerged for more than
3 minutes.

Do not expose the device to water moving
with force.
Perhaps the device exposed to clean water,
dry it thoroughly with a clean soft cloth. If the
device is exposed to other liquids such as
salt water, ionized water, or alcoholic beverage,
rinse it with clean water and dry it thoroughly
with a clean soft cloth. If you do not follow
these instructions, the device performance and
appearance may be affected.
If the device has been immersed in water or
the microphone or speaker is wet, sound may not
be heard clearly during a call.
After wiping the device with a dry cloth, dry it
thoroughly before using it.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.

The FCC Statement of Exposure to RF and the SAR limit for the United States (FCC) is 1.6 W/kg average for each gram of tissue. This device was tested for typical operations of use on the body. This device was tested for typical operations 0mm from the body.
